AirTech + Technology 4x4

The 4x4 technology, developed by Base Protection, combines the lightness of the sole with a high resistance to bending, abrasion and tearing.

The AirTech + Tpu-Skin Ultraflex outsole combines the anti-fatigue effect with a better shoe flexibility.

- The external sole layer, the outsole, is reduced to 0.2 mm, a more resistant "skin" to flexions and abrasion.
- The outsole reduction increases the Air-Tech thickness, softer and elastic, improving the shock absorption and body weight distribution.

Result: an ideal shoe for outdoor work, light and robust at the same time.

SlimCap

- Metal free toe-cap lighter
- Cap's thickness reduced **35% less weight** compared to the market standard weight.
